

Clip-Seam Galvanised Steel Pipe

Clip To Connect And Effortlessly Exhaust Unwanted Fumes.

Description:

Our Clip-Seam Galvanised Steel Pipe is designed for efficient exhaust ventilation, making it ideal for venting fans or rangehood fumes through a Roof Mushroom Cowl. Made from durable 30-gauge galvanised steel, its unique clip-seam design ensures a smooth internal surface for maximum airflow efficiency. The seams securely connect at one end and continue along the length of the pipe to form a solid, airtight structure. The crimped end allows for easy connection to additional piping or ducting.

Key Highlights:

- Designed for Roof Mushroom Cowl outlets, ensuring an effective venting solution.
- The crimped end allows seamless extension with additional piping or duct.
- Constructed from heavy-duty 30-gauge galvanised steel for maximum durability.
- Offers high fire resistance, built to withstand high temperatures for added safety.

Dimensions (mm)

Model No.	Description	Diameter (mm)	Height (mm)	Opened W x H (mm)
GSPS042430	Clip-Seam Pipe - Galvanised Steel (100mm)	100	610	314.16 x 610
GSPS052430	Clip-Seam Pipe - Galvanised Steel (125mm)	125	610	392.70 x 610
GSPS062430	Clip-Seam Pipe - Galvanised Steel (150mm)	150	610	471.24 x 610
GSPS082430	Clip-Seam Pipe - Galvanised Steel (200mm)	200	610	628.32 x 610
PPS04430	Clip-Seam Pipe - Galvanised Steel (100mm)	100	1200	314.16 x 1200
PPS04430	Clip-Seam Pipe - Galvanised Steel (125mm)	125	1200	392.70 x 1200
PPS04430	Clip-Seam Pipe - Galvanised Steel (150mm)	150	1200	471.24 x 1200
PPS04430	Clip-Seam Pipe - Galvanised Steel (200mm)	200	1200	628.32 x 1200

Please Note: Being Galvanised Steel constructed our Clip-Seam Pipes comply to BAL40 (Bushfire Attack Level 40) provided that the **Roof Mushroom Cowl** and **Roof Flashing** also meets BAL compliance standards. For optimal safety and performance, we recommend that a qualified tradesperson install the Clip-Seam Piping and any through-the-roof ventilation.
